

## Scoping requests

Before making an application to the IPC for development consent a promoter may ask the Commission for their formal opinion as to the information to be supplied in the environmental statement. This is known as a scoping opinion. This helps to identify the topics on which the environmental statement should focus.

The Commission must consult the consultation bodies and the developer before adopting its scoping opinion, and may request more information if necessary.

Where a promoter has requested a scoping opinion from the IPC for their project proposal a link is included to their website above, so that you may view this information at the promoter's website.
